

Claims

- [c1] 1. A steering wheel desk having a smooth flat surface free of holes or slots, with two integral hangers at the top, and an integral support ledge at the bottom.
- [c2] 2. The device recited in claim 1 has hangers that are unique in design due to the angle of approximately 135 degrees allowing the device to be instantly positioned correctly over a variety of diameters and shapes of steering wheels. This allows for attachment to the steering wheel to be snug and wobble free.
